About Me

Hi there, I'm Andres Robayo, a passionate and dedicated software developer with a strong drive for continuous learning and innovation. My expertise encompass both back-end and front-end development, with a particular focus on programming languages like PHP, JavaScript, Python, and Go. I enjoy overcoming challenging problems and find fulfillment in designing applications that optimize processes and enrich users' lives. My aim is to create innovative, user-centered solutions that deliver meaningful and lasting value.

Education

Software developer

Sena - Servicio nacional de aprendizaje

Systems engineer

Unad - Universidad nacional abierta y a distancia

Work Experience

Queen Software

2019-2022

Full stack developer

Develop web apps with Laravel and Vue.js, integrate APIs, optimize and manage databases, ensure security with authentication and updates, write and debug tests, collaborate using Git, and align goals with stakeholders through agile practices for efficient delivery.

Waco Services

2022-current

Backend developer

Develop scalable back-end systems and APIs using Php, Python, JavaScript, and Go, manage databases, implement secure APIs, optimize performance, and integrate frontend-backend systems. Collaborate using Git, write tests, debug issues, and ensure secure, well-documented code.
